Please don't take valuable, possibly life-saving, information away from the public by eliminating weather and traffic information via XM satellite. We've been caught in severe storms and if it weren't for the broadcast service of the weather on XM we wouldn't have been able to be updated as to the severity of the weather. Please consider my voice and that of my husbands and those relatives with us during the severe storms that we've encountered when making decisions that could have a fatal impact on citizens.
